

Multi-Domain Operations sustainment starts and ends in the Strategic Support Area. The SSA is where our Nation's military might is first generated, where it is projected and where it is sustained.

As the Army Command responsible for the readiness of the Strategic Support Area, Army Materiel Command has identified seven focus areas:

SOLDIER, CIVILIAN & FAMILY READINESS

Health, safety and welfare of our Soldiers, Civilians and Families are our primary responsibility.

INSTALLATION READINESS

Installations are the Army's epicenters, not only where Soldiers live, but where they train, conduct the day-to-day business of the Army, mobilize and deploy to anywhere our Nation requires.

INDUSTRIAL BASE READINESS

The Army's Organic Industrial Base – 26 Depots, Arsenalns and Plants – manufactures and resets Army Equipment, generating readiness and operational capability through Army formations.

MUNITIONS READINESS

Having the right munitions from small caliber ammunition to ballistic missiles in the right place, at the right time, to meet requirements.

STRATEGIC POWER PROJECTION READINESS

AMC's Transportation Hubs, Depots, Arsenalns, Plants, Ports and installation infrastructure are key to the Nation's power projection capabilities, enabling the rapid and effective deployment and sustainment of forces.

SUPPLY AVAILABILITY & EQUIPMENT READINESS

Supply availability and equipment readiness ensure our Soldiers have the right parts, equipment and materiel where and when they need it.

LOGISTICS INFORMATION READINESS

Logistics data provides the tools Army decision-makers need to support readiness and modernization initiatives to move us from the Industrial Age to the Information Age.
