

1. A unit submits a movement request to its supporting movement control team (MCT).
2. The MCT commits mode operator for available common user transportation (CUT) assets to fill the request based on the established priority of support.
3. If CUT assets are not available, the MCT sends the request to the higher battalion headquarters.
4. The movement control battalion (MCB) verifies that necessary CUT assets are not available to the MCT forwarding the request. Once verified, the MCB will search for other CUT mode operators to fill the request.
5. If it lacks the assets, the MCB will forward the request to higher headquarters.
