

# **DEFENSE INDUSTRIAL BASE**

## **A Selected Bibliography**

**U.S. ARMY LOGISTICS UNIVERSITY LIBRARY**

**May 2017**

Without supplies neither a general nor a private is good for anything.

-Xenophon (late fifth-early fourth century B.C.),  
in The Persian Expedition

The satisfaction I have in any successes that attend us...is always allayed by a fear that it will lull us into security. Supineness and a disposition to flatter ourselves seem to make parts of our national character. When we receive a check, and are not quite undone, we are apt to fancy we have gained a victory; and, when we do gain any little advantage, we imagine it decisive and expect the war immediately at an end. The history of the war is a history of false hopes and temporary expedients.

-George Washington  
Letter to James Duane, in Congress, October 4, 1780

## PREFACE

The study of the Defense Industrial Base is a significant area of study for the United States Army. The purpose of this bibliography is to provide an introduction to some of the resources readily available at the U. S. Army Logistics University Library or on the Internet about the Defense Industrial Base. It is not a comprehensive listing of resources, but is intended to serve as a starting point for research.

Most of the resources in this bibliography are dated from 1994 to the present. All items are available through the Army Logistics University (ALU) Library, either within the physical library collection or on the internet. For convenience we have added ALU Library call numbers, internet addresses, or database links at the end of each entry. Web sites we accessed June 2015.

Due to licensing agreements, access to articles in the ALU Library's subscription databases is limited to users on computers that have a Fort Lee IP address. For the Army community stationed elsewhere or deployed, many articles are online in AKO's "My Library" databases. Local libraries are another option.

This bibliography and others compiled by the ALU Library are available online through the Library's ALU Webpage page at <http://www.alu.army.mil/index.html>.

For additional information please contact the Circulation desk, U. S. Army Logistics University Library, by sending an email to [usarmy.lee.tradoc.mbx.army-logistics-library@mail.mil](mailto:usarmy.lee.tradoc.mbx.army-logistics-library@mail.mil), or by calling 804-765-8170 (commercial) or 539-8170 (DSN).

Compiled by  
ALU Library Reference Staff
